

1. Package Contents

Thank you for purchasing PLANET compact industrial 5-port 10/100/1000T Gigabit Ethernet Switch, IGS-500T. In the following section, the term "Industrial Gigabit Ethernet Switch" means the IGS-500T.

Open the box of the Industrial Gigabit Ethernet Switch and carefully unpack it. The box should contain the following items:

Industrial Gigabit Ethernet Switch x 1	User's Manual x 1
	
Wall-mount Kit	DIN-rail Kit
	

If any of these are missing or damaged, please contact your dealer immediately; if possible, retain the carton including the original packing material, and use them again to repack the product in case there is a need to return it to us for repair.

2. Product Features

Physical Port

- 5-port 10/100/1000BASE-T RJ45 with auto-MDI/MDI-X function

Layer 2 Features

- Complies with IEEE 802.3 10BASE-T, IEEE 802.3u 100BASE-TX, IEEE 802.3ab 1000BASE-T Ethernet standard
- Supports auto-negotiation and 10/100Mbps half/full duplex and 1000Mbps full duplex
- Prevents packet loss with back pressure (half-duplex) and IEEE 802.3x pause frame flow control (full-duplex)
- High-performance Store and Forward architecture, broadcast storm control and runt/CRC filtering eliminate erroneous packets to optimize the network bandwidth
- Backplane (switching fabric): 10Gbps
- Integrated address look-up engine, supporting 4K absolute MAC addresses
- 9K jumbo packet size
- Automatic address learning and address aging
- CSMA/CD Protocol

Industrial Case and Installation

- IP30 metal case
- DIN rail and wall-mount design
- 12 to 48V DC, redundant power with polarity reverse protect function and connective, removable terminal block for master and slave power; 24V AC power support
- Supports 6000 VDC Ethernet ESD protection
- 40 to 75 degrees C operating temperature
- Free fall, shock-proof and vibration-proof for industries

- 2 -

3. Product Specifications

Model	IGS-500T
Hardware Specifications	
Copper Ports	5 x 10/100/1000BASE-T RJ45 TP auto-MDI/MDI-X, auto negotiation
Connector	Removable 6-pin terminal block Pin 1/2 for Power 1; Pin 3/4 for fault alarm; Pin 5/6 for Power 2
Alarm	Provides one relay output for power failure Alarm relay current carry ability: 1A@DC 24V
LED	3 x LED for system and power: ● Green: DC Power 1 ● Green: DC Power 2 ● Red: Power Fault 2 x LED for each copper port ● Green: 1000Mbps LNK/ACT ● Orange: 10/100Mbps LNK/ACT
ESD Protection	6KV
EFT Protection	6KV
Power Requirements	12~48V DC, redundant power with polarity reverse protection function, 24V AC power support
Power Consumption / Dissipation	3.6 watts/12.35BTU
Installation	DIN-rail kit and wall-mount ear
Enclosure	IP30 metal case
Dimensions (W x D x H)	70 x 104 x 30 mm
Weight	252g

4. Hardware Introduction

4.1 Three-View Diagram

The three-view diagram of the Industrial Gigabit Ethernet Switch consists of five auto-sensing 10/100/1000BASE-T RJ45 port and one removable 6-pin terminal block. The LED indicators are also located on the front panel.

Figure 1: IGS-500T Three-View Diagram

- 5 -

LED Definition:

LED	Color	Function
P1	Green	Lights to indicate power input 1 has power.
P2	Green	Lights to indicate power input 2 has power.
Fault	Red	Lights to indicate that power 1 or power 2 has failed.
1000 LNK/ACT	Green	Lights: Indicating the port is running at 1000Mbps speed and successfully established. Blinks: Indicating that the switch is actively sending or receiving data over that port.
100 LNK/ACT	Orange	Lights: Indicating the port is running at 10/100Mbps speed and successfully established. Blinks: Indicating that the switch is actively sending or receiving data over that port.

Top View:

Figure 3: IGS-500T Top View

4.2 Wiring the Power Inputs

The 6-contact terminal block connector on the top panel of Industrial Gigabit Ethernet Switch is used for two DC redundant power inputs. Please follow the steps below to insert the power wire.

- 7 -

Front View:

Figure 2: IGS-500T Front View

- 6 -

When performing any of the procedures like inserting the wires or tightening the wire-clamp screws, make sure the power is OFF to prevent from getting an electric shock.

1. Insert positive and negative DC power wires into contacts 1 and 2 for POWER 1, or contacts 5 and 6 for POWER 2.

2. Tighten the wire-clamp screws for preventing the wires from loosening.

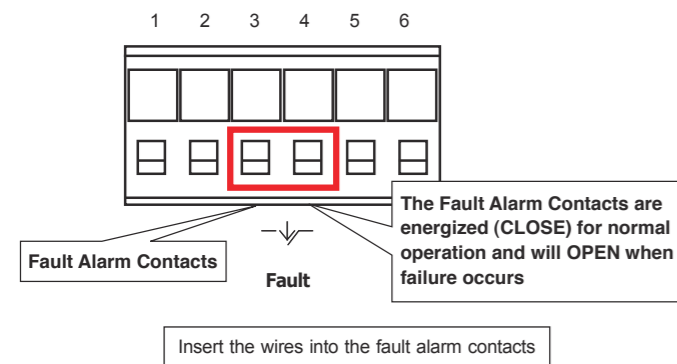

1. The wire gauge for the terminal block should be in the range between 12 and 24 AWG.
2. The DC power input range is 12V ~ 48V DC and supports 24V AC
3. Please just use one power input when using 24V AC.

- 8 -

4.3 Wiring the Fault Alarm Contact

The fault alarm contacts are in the middle of the terminal block connector as the picture shows below. Inserting the wires, the Industrial Gigabit Ethernet Switch will detect the fault status of the power failure and then forms an open circuit. The following illustration shows an application example for wiring the fault alarm contacts.

Note

1. The wire gauge for the terminal block should be in the range between 12 and 24 AWG.
2. Alarm relay circuit accepts up to 24V DC, 1A.

5. Installation

This section describes the functionalities of the Industrial Gigabit Ethernet Switch's components and guides you to installing it on the DIN rail and wall. Please read this chapter completely before continuing.

This following picture tells the user how to install the device, and the device is not IGS-500T.

5.1 DIN-rail Mounting Installation

The DIN rail is screwed on the Industrial Gigabit Ethernet Switch when out of factory. When replacing the wall-mount application with DIN-rail application, Industrial Gigabit Ethernet Switch is needed. Please refer to the following figures to screw the DIN rail on it. To hang the Industrial Gigabit Ethernet Switch, follow the following steps:

Step 1: Screw the DIN rail on the Industrial Gigabit Ethernet Switch.

Step 2: Lightly insert the bottom of the switch into the track

Step 3: Make sure the DIN rail is tightly secured on the track.

Step 4: Please refer to the following procedure to remove the Industrial Gigabit Ethernet Switch from the track.

Step 5: Lightly pull out the bottom of the switch for removing it from the track.

5.2 Wall-mount Plate Mounting

To install the Industrial Gigabit Ethernet Switch on the wall, please follow the instructions described below.

Step 1: To remove the DIN rail from the Industrial Gigabit Ethernet Switch, loosen the screws.

Step 2: Place the wall-mount plate on the rear panel of the Industrial Gigabit Ethernet Switch.

Step 3: Use the screws to screw the wall-mount plate on the Industrial Gigabit Ethernet Switch.

Step 4: Use the hook holes at the corners of the wall-mount plate to hang the Industrial Gigabit Ethernet Switch on the wall.

Step 5: To remove the wall-mount plate, reverse the steps above.

EC Declaration of Conformity

For the following equipment:

*Type of Product : Industrial 5-Port 10/100/1000T Compact Gigabit Ethernet Switch
*Model Number : IGS-500T
* Produced by :
Manufacturer's Name : Planet Technology Corp.
Manufacturer's Address : 10F., No.96, Minquan Rd., Xindian Dist., New Taipei City 231, Taiwan, R.O.C.

is herewith confirmed to comply with the requirements set out in the Council Directive on the Approximation of the Laws of the Member States relating to Electromagnetic Compatibility Directive on (2014/30/EU).

For the evaluation regarding the EMC, the following standards were applied:

EN 55032	(2015 + AC:2016)
EN61000-3-2	(2014)
EN61000-3-3	(2013)
EN 55024	(2010 + A1:2015)

Responsible for marking this declaration if the:

Manufacturer Authorized representative established within the EU

Authorized representative established within the EU (if applicable):

Company Name: Planet Technology Corp.
Company Address: 10F., No.96, Minquan Rd., Xindian Dist., New Taipei City 231, Taiwan, R.O.C.

Person responsible for making this declaration
